

HIGH PERFORMANCE RACING RANGE

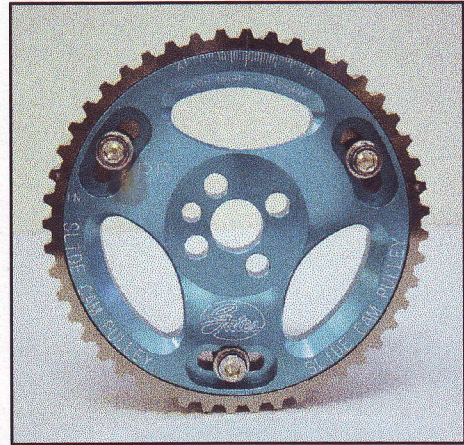

April 2006

Dear Customer,

RE: NEW SLIDE CAM PULLEY

Gates are pleased to introduce the NEW Slide Cam Shaft Pulleys, a new addition to the Gates High Performance Product Range. The pulleys allow you to adjust the valve timing for increased engine power.

Gates Slide Cam Shaft Pulley's are made in Japan, from a lightweight duralumin construction, reducing the overall weight of the pulley. The pulley's have a nickel plated cog that resist distortion and wear.

The Gates Racing range of Slide Pulleys consists of 6 part numbers as listed below:

PART NUMBER	APPLICATION	TYPE
2204-RT0003	Toyota 1JZ-G(T)E 2JZ-G(T)E (not suitable for WT-1)	Inlet or Exhaust
2204-RT0002	Toyota 3S-G(T)E (not suitable for WT-1)	Inlet or Exhaust
2204-RN001	Nissan RB26DETT, RB25DE(T) & RB20DE(T) (not suitable for NVCS Camshaft)	Inlet
2204-RN002	Nissan RB26DETT, RB25DE(T) & RB20DE(T)	Exhaust
2204-RH001	Honda B16A, B16B & B18C	Inlet or Exhaust
2204-RM001	Mitsubishi 4G63	Inlet or Exhaust

Please contact Gates Australia Customer Service on (03) 9797 9688 if you require additional information on these Slide Camshaft Pulleys, or any other Gates product.

Kind Regards

Priscilla Robb
