GATES HEAVY-DUTY TENSIONERS

FEATURES & BENEFITS

- Patented round spring is stronger as it applies even rotational load and constant tension across a wider range of motion.
- Gates tensioners have a patented damper that absorbs extreme shock-loads resulting in better alignment and increased service life for the entire drive.
- Gates also uses a labyrinth seal to protect the internal components of the tensioner. This system consists of a series of interlocking channels between the spring housing and the base of the tensioner arm. This method of sealing keeps the tensioner contamination - free of dust, dirt and petroleum products, thereby assuring longer life.

DESIGNED TO LAST 3 X LONGER THAN COMPETITIVE TENSIONERS AT UNBEATABLE PRICES
